**881** architectural and engineering professionals and **4774** other supporters including A&E students have signed the petition demanding of Congress a truly independent investigation.

The petition is open to **everyone.**

Sign the petition

As seen in this revealing photo, the **Twin Towers' destruction** exhibited *all* the characteristics of destruction by explosives: (and some non-standard characteristics)

1. **Destruction** proceeds through the path of greatest resistance at **nearly free-fall acceleration**

[National Geographic Channel on 9/11: Manipulation vs. Objectivity](#)

— Dwain Deets and Gregg Roberts

AE911Truth plans to release a longer response than this one as soon as resources permit. In the meantime, readers are encouraged to examine these other recently published pieces:

Jim Hoffman, [National Geographic Does 9/11: Another Icon Debased in Service of the Big Lie](#)

Kevin Ryan, [Finally, an Apology From the National Geographic Channel](#) (with comments at [Kevin Ryan's Blog](#)).

Richard Gage, AIA, Gregg Roberts, and David Chandler, [Evidence for the Explosive Demolition of World Trade Center, Building 7 on 9/11](#)

National Geographic Channel (NGC) first broadcast its two-hour special misleadingly entitled "9/11: Science and Conspiracy," on August 31, 2009. NGC, with 67% ownership by Rupert Murdoch, posed as a neutral party explaining both sides in an ongoing dispute. In reality, it manipulated the presentation, doing many subtle and not so subtle things to support the side of the official story.

In actuality, this so-called documentary was a de facto hit piece, an assault on truth, and obviously skewed in support of the government's explanation of 9/11 and against "9/11 truth." Whatever their intentions, the producers failed completely in any supposed attempt at balanced reporting and a fair presentation of both sides of the story.

[Ed Asner30sec.wav](#)

[Ed Asner60sec.wav](#)

2. **Improbable symmetry** of debris distribution
3. Extremely **rapid onset** of destruction
4. Over 100 first responders reported [explosions and flashes](#)
5. Multi-ton steel sections [ejected laterally](#) 600 ft at 60 mph
6. [Mid-air pulverization](#) of 90,000 tons of concrete & metal decking
7. Massive volume of expanding [pyroclastic-like clouds](#)
8. [1200-foot-dia.](#) debris field: **no "pancaked" floors** found
9. Isolated [explosive ejections](#) 20 – 40 stories below demolition front
10. [Total building destruction](#): dismemberment of steel frame
11. Several tons of [molten metal](#) found under all 3 high-rises
12. Evidence of [thermite incendiaries](#) found by FEMA in steel samples
13. Evidence of [explosives](#) found in dust samples
14. **No precedent** for steel-framed high-rise collapse due to fire

**And exhibited none of the characteristics of destruction by fire, i.e.**

1. Slow onset with large visible deformations
2. Asymmetrical collapse which follows the path of least resistance (laws of conservation of momentum would cause a falling, intact, from the point of plane impact, to the side most damaged by the fires)
3. [Evidence of fire temperatures](#) capable of softening steel
4. [High-rise buildings](#) with much larger, hotter, and longer lasting fires have never "collapsed"

**WTC Building #7, a 47-story high-rise not hit by an airplane, exhibits all the characteristics of a classic controlled demolition with explosives:** (and some non-standard characteristics)

1. [Rapid onset](#) of "collapse"
2. [Sounds of explosions](#) at ground floor - a full second prior to collapse
3. [Symmetrical "collapse"](#)— through the path of *greatest* resistance – **at free-fall acceleration**
4. **Imploded**, collapsing completely, and landed mostly [in its own footprint](#)
5. Massive volume of [expanding pyroclastic dust clouds](#)
6. Several tons of [molten metal](#) reported by numerous highly-qualified witnesses
7. Chemical signature of [Thermite \(high tech incendiary\)](#) found in solidified molten

[Upcoming Events for AE911Truth](#)

— Editor

[We're Off to San Francisco, New Jersey, and New York City](#)

What's coming up for AE911Truth?

On August 31 the National Geographic Channel (NGC) hit piece on 9/11 conspiracies aired for the first time, then again on September 5. We have posted an [initial response](#). We

will continue to enhance the article as resources permit. See also these critiques by [Jim Hoffman](#) and [Kevin Ryan](#).

The NGC's promotional webpage didn't bode well for "fair and balanced" reporting, implying that all the science is on one side and we, the conspiracy theorists, are on the other. While its producers interviewed Richard Gage, AIA, Steven Jones, David Ray Griffin, Dylan Avery, and others, and we gave them the very clear evidence, we anticipated that they would be painting 9/11 skeptics in an unfavorable light. They didn't let us down. The show included quite dubious

metal, and dust samples by physics professor Steven Jones, PhD.

8. FEMA finds rapid oxidation and [intergranular melting](#) on structural steel samples
9. [Expert corroboration](#) from the top European Controlled Demolition professional
10. [Fore-knowledge](#) of "collapse" by media, NYPD, FDNY

And exhibited *none* of the characteristics of destruction by fire, i.e.

1. Slow onset with large visible deformations
2. Asymmetrical collapse which follows the path of least resistance (laws of conservation of momentum would cause a falling, to the side most damaged by the fires)
3. Evidence of fire temperatures capable of softening steel
4. [High-rise buildings](#) with much larger, hotter, and longer lasting fires have never "collapsed".
